- Tool less belt removal.
- Solid Urethane belts.
- Shown with optional cantilever designed frame.
- Full welded food grade seams.

Eaglestone Equipment knows the challenges of sanitation for the food service professional. With the constant concern of bacteria growth, inspections, and proper food handling; conveyors should be a help, not a hindrance. This is why we developed the 1900 flip clean conveyor. With the tool less flip clean end, you can easily remove the tension from the belt and either clean in place or remove the entire belt for sanitation.

Easily remove belt for sanitation.
